## MISSOURIAN IS NAMED TO POST ON NEW CABINET

Former Governor Arthur  
M. Hyde, Agriculture  
Secretary

## ONE NAME STILL SAID UNKNOWN

Appointment Surprise To  
Many; Supported  
Lowden

BULLETIN  
Washington, March 2.—The  
cabinet of President-elect  
Hoover was completed today  
with the selection of Robert  
Patterson Lamond of Chicago  
to be secretary of commerce.

Washington, March 2.—The  
selection of ex-Governor Arthur M.  
Hyde of Missouri, to be secretary  
of agriculture, left only one member  
of the Hoover cabinet to be  
identified today.

A secretary of commerce has been  
chosen, but his identity yet remains  
secret. It probably will become  
known before Mr. Hoover submits  
his cabinet slate to the senate  
Monday noon.

Hyde's selection was one of the  
two "surprises" forecast by the  
Hoover aides earlier in the week.  
The secretary of commerce is the  
other.

The Missourian had not figured  
prominently in the cabinet speculation  
at all, chiefly because he was  
of that wing of the party that  
favored the nomination of Frank O.  
Lowden at Kansas City last June.  
The invitation to him to become a  
member of the Hoover administration  
and his acceptance thus gives  
recognition to that faction  
which few had anticipated.

Fully a score of names were  
considered at one time or another  
for the agricultural post, which  
under the Hoover administration  
assumes an importance not  
ordinarily attached to it.

Special Session April 10  
The special session of the new  
congress, to be called on April 10,  
is dealt primarily with two matters,  
farm relief and tariff revision.  
Whatever form of farm relief  
congress prescribes, its administration  
will be in the hands of Gov. Hyde.  
Hence the post will be the cynosure  
of western eyes for some time to  
come.

Indications were today that a  
decision upon the Missourian was  
reached definitely only a few days  
ago, although he had been discussed  
in the innermost Hoover circles for  
several weeks.

Gov. Hyde is 51 years old. He was  
governor of Missouri from 1920 to  
1924, and at the Cleveland convention  
in '24 was mentioned for the  
vice presidency, which ultimately  
went to Charles G. Dawes. He was  
a Roosevelt follower in the split of  
1912.

The Missourian is a practical  
farmer as well as an executive,  
and business man. He owns several  
farms in Missouri, besides conducting  
an insurance business in Kansas  
City. He is conspicuously dry, having  
taken the dry side of the question  
in his gubernatorial contest  
at a time when Missouri was  
considered wet.

## DYNAMITE ENDS BLAZE MENACE

Ohio's "Live Volcano" Subdued By  
Use of Explosive; Buildings Out  
Of Danger Now

New Straitsville, O., March 2.—  
Dynamiting had today saved from  
possible destruction a school and  
several homes on the outskirts of  
this village.

The buildings had been menaced  
by the 45-year-old mine fire which  
has been burning the surface a few  
days ago. The smoldering crater  
was dynamited shut by miners.  
Through it flames had leaped many  
feet into the air, and lethal gas had  
poured forth.

The dynamiting was accomplished  
without any damage to any of  
the buildings.

## ROBBER WORKS IN DRUG STORE

Bandit Enters Same Store 4 Times  
In Row; Steals Gun From  
Policeman

Cleveland, March 2.—Police here  
today were seeking a bandit who  
has held up an East Side drug store  
four times within the last seven  
months, staging his latest robbery  
last night and taking a pistol from  
a policeman assigned to guard the  
store.

The policeman, Patrolman Leo J.  
Losa, was changing his coat in the  
prescription room of the store when  
the robber entered, with the clerk  
and proprietor, forced Honsa to lie  
on the floor, took his pistol from  
the holster, and then escaped with  
\$158 from the safe.

## STOLEN GIRL IS RETURNED HOME

Divorced Mother Responsible For  
Disappearance of Eight-  
Year-Old Lass

Ironton, O., March 2.—Eloise Mil-  
lan, the eight-year-old girl who was  
abducted from a school here, was  
back in the home of her father, El-  
mer Milan, today.

After being missing for three days  
the girl was located by her father  
at the home of Mrs. Jeanette Milan,  
his divorced wife, at Kenova, W. Va.  
Milan, who had filed kidnapping  
charges against his former wife,  
dropped them, informing officers  
Mrs. Milan had promised to never  
again molest any of the three chil-  
dren, and to allow a 10-year-old son  
to return to his father.

In his search for his daughter,  
Milan traced the mother to Detroit,  
Covington, Ky., and finally to  
Kenova.

## WIFE'S LOVE IS VALUED HIGHLY

Three Hundred Thousand Dollars Is  
Its Worth, Columbus Man  
Claims In Suit

Columbus, O., March 2.—Three  
hundred thousand dollars is the val-  
uation which Floyd D. Day, of Col-  
umbus, placed on the love of his  
wife.

Suit, for damages to that amount,  
had today been filed by the local  
man against Mrs. Zesta Griess, his  
mother-in-law, who, Day avers,  
caused his wife to leave him.  
The mother-in-law is also blamed  
for the mother taking their child  
away from the father, five days after  
she deserted him.

## MANY HOMICIDE CASES IN STARK

Two Indicted On First  
Degree Charges; Some  
Are Released

Canton, March 2.—Stark county  
courts today were confronted by the  
heaviest homicide docket in years  
following a report by the county  
grand jury late yesterday.

Two first degree murder indict-  
ments, two second degree indict-  
ments, and one manslaughter in-  
dictment were returned by the  
grand jury while three other homi-  
cide cases were ignored and one  
case was held for further investiga-  
tion.

George Todoroff, who admits  
killing Helen Burkhardt by slashing  
her throat after she refused to  
marry him, and Peter Musso who  
confesses slaying Alexander Miller  
because the latter played practical  
jokes on him, face first degree mur-  
der charges. Arthur Peterson, charged  
with stabbing his wife,  
Lessa, to death in a Massillon hotel  
and Charles Eagles, alleged to have  
shot and killed Dollie Young in Al-  
liance, are held on second degree  
indictments.

Several Released  
William Law, charged with run-  
ning down and killing Mary Brueger  
in an automobile, was indicted for  
manslaughter. William Murray,  
charged with inflicting fatal injuries  
on another man with a ham-  
bone; Mary Atkins, charged with  
stabbing her husband to death; and  
Lee Williams who was alleged to  
have shot a prowler trying to enter  
his home, were released.

Testimony showed Murray's al-  
leged victim had fights with two  
other men after his encounter with  
Murray; that Mrs. Atkins cut her  
husband after he had slashed her;  
and that the man Williams killed  
was a disreputable character, trying  
to force his way into Williams' home.  
Charges against William  
Greeshole, held on a charge of  
shooting a Massillon merchant dur-  
ing a robbery, are to be considered  
further. Peterson, Eagles, Murray  
and Mary Atkins are negroes.

It was one of the heaviest sessions  
ever held by a Stark county grand  
jury in one week. The jurors heard  
195 witnesses in 48 cases and return-  
ed 23 indictments. Nine cases were  
ignored and several were held open.

## CELL KILLER TO DIE IN CHAIR

Clubbed Man to Death  
While in Jail;  
Is Calm

Cleveland, March 2.—James T.  
Nevins, a lake sailor, formerly of  
Detroit, who murdered Don Prentiss,  
Detroit, auto sales executive, while  
both were prisoners in the county  
jail here, today faced the grim pros-  
pect of death in the electric chair,  
following his conviction of first de-  
gree murder late yesterday.

The jury which found Nevins  
guilty did not recommend mercy  
and Judge N. Craig McBride, sitting  
here by assignment from Delaware  
O., is thus required to sentence him  
to death in the state penitentiary  
at Columbus.

Nevins and Prentiss were both  
federal prisoners at the time of the  
killing. Nevins was under sentence  
for writing obscene letters to the  
Marine hospital and was awaiting  
transfer to the federal penitentiary  
at Atlanta.

Prentiss, formerly a high-salaried  
auto salesman, with a wife and two  
children in Detroit, had been ar-  
rested here on a charge of violating the  
Mann act.

He and Nevins were cellmates in  
the county jail. Nevins said the  
young salesman made slanderous  
remarks about Nevins' sisters, who  
also live in Detroit. Nevins, it was  
charged, beat Prentiss to death with  
a piece of pipe while Prentiss was  
asleep.

Nevins took the verdict calmly  
when the jury returned late yester-  
day. His cell, directly above that  
in which the murder was commit-  
ted, adjoins that of Joseph Weaver  
who was returned from Columbus  
yesterday after being granted a new  
trial. Weaver had been under the  
death sentence and preparation for  
his execution were made several  
times at the penitentiary.

"Glad you beat the rap," Nevins  
told Weaver last night.

## Sheep Killed

Lisbon, March 2.—Four sheep  
were killed outright, six were in-  
jured, some fatally by dogs on the  
farm of Henry Ketchum, Hepner  
Hollow, southwest of Lisbon early  
Friday morning, it has been re-  
ported to County Dog Warden C. A.  
Donahay. The sheep had been list-  
ed on the tax duplicate at \$10 per  
head.

SOMETIMES MIGHTY  
TEMPERAMENTAL

THE president of the Chicago Federation of Musicians has announced that "on and after March 1, operators of phonographs or other mechanical devices for producing music in broadcasting studios must be members of the Chicago Federation of Musicians." In making the announcement, he stated that any obstinacy on the part of the station owners would result in the issuing of a strike call to orchestras.

The operation of a phonograph, it is stated, in connection with the report of the announcement, consists in the putting on or taking off of a record, now and then, and the changing of a needle, an operation which any fifteen-year-old school boy or girl can do just as satisfactorily as any musician in the land, but if a member of the Chicago Federation of Musicians is employed for the purpose, he must be paid the union scale, which ranges in Chicago from \$90 to \$115 a week, which will mean from \$2,610 to \$4,335 for the twenty-nine stations of the Windy City.

The talking movies, though far from the success it is hoped they may be and which they may ultimately become, have proved something of a blow to the musicians of the land. Added to this, the mechanical contrivances for the production of music which have been adopted by many motion picture houses, have had their effect. Probably more musicians are idle today than have been out of employment in years.

Yet there doesn't seem to be any general inclination on the part of the public to resent the supplanting of orchestras by the mechanical devices employed. It may be for that reason that many do not care for musical accompaniment to the pictures; it may be that the substitutes are acceptable to the majority of movie patrons; it may be that some do not know the difference, and there is the further possibility that the majority of movie patrons the land over feel that the musicians have been somewhat arbitrary in their demands and hence are out of sympathy with them. It's always easy, in dealing with the public, to kill the goose that lays the golden eggs. The public is mighty temperamental at times.

## What Others Say

## AIR PRESSURE

Forty pounds is sufficient air pressure for the tires of the average car. From this the motorist can get a conception of the power of a machine, perfected by a Harvard professor of physics, which is capable of exerting a pressure of 600,000 pounds. It is the greatest pressure attained by human artifice and with it he has engaged in some surprising experiments.

He is said to have boiled an egg in ice water and to have produced a solid block of ice from water heated to a temperature of 150 degrees, without lowering the temperature of the water. The egg, at any rate, must have been very hard, even if not hard-boiled after being subjected to such force. The temperature of the block of ice was 118 degrees above "freezing."

Neither of these experiments indicates that the machine can be put to any practical use, though doubtless it will be. The old teakettle is a much handier utensil for boiling an egg, and superheated ice, that would burn one's fingers if one touched it, could not be used in refrigerators. None the less, the device is of interest in this period of high pressure salesmanship. It shows how many things in our daily lives depend upon pressures being evenly maintained. But a cup of coffee on Pike's Peak, where the boiling point is low and the coffee correspondingly weak, teaches much the same lesson.—St. Louis Globe-Democrat.

## The Stars Say—

For Sunday, March 3

SUNDAY'S horoscope is a fairly interesting one excepting for those in the employment of others, who are enjoined to safeguard their positions. It is a good day for correspondence or literary pursuits, but otherwise is a day of rest.

Those whose birthday it is may find a year in which business may move along in a fairly satisfactory way, but those in employment are under a condition enjoining the utmost devotion to their positions and to the interests of their superiors. Let no friction or pettiness jeopardize positions. A child born on this day may be fairly clever and versatile, but it may find it difficult to keep in employment. It may have some tendencies to friction and petty insubordination and irritabilities.

The very stars tremble above, as though the Voice Divine reverberated through the great expanse.—Anna Katherine Green.

For Monday, March 4

EXPECT not much from the hands of fate, adjoins a certain astrological adviser, yet the chart for this day points to several outstanding events of a personal as well as a business nature. In the realm of social, domestic and romantic affiliations there may be important developments, to bring much advantage and pleasure. In business new ventures are in order, but nevertheless there may be delays and obstructions, and the entire situation may be complicated by rashness, turbulence and ill-temper.

Those whose birthday it is may look for a year of some pleasant personal experiences. In business there may be new ventures, but these may be thwarted, postponed or nullified by turbulence and lack of restraint and good management. With care things may be made to progress. A child born on this day may be endowed with many contradictory qualities. It may have many social qualities and talents, but also may be impetuous and turbulent. Its career will not be monotonous. Fate is unpenetrated causes.—Emerson.

FOOD MUST SUPPLY  
FIFTEEN MINERALS

BY ROYAL S. COPELAND, M. D.  
(United States Senator from New York)

Proper feeding is essential to good health. The term "proper feeding" includes several factors. First, of course, is proper food. But after you have a supply of good food, it must be well prepared and taken in correct amounts.

If foods animal or vegetable or both are placed in a furnace and burned, ashes will be left, just as ashes are left after burning wood or coal. The scientist uses this word in the singular, referring always to the indestructible remnant as the "ash."

DR. COPELAND

Sometimes the ash is given another name, the "salts" of the food. As a matter of fact, the mineral elements in foods are usually found in combinations and not singly. The salts of fruits and vegetables are just as necessary to the welfare of the body as are the heat-producing and energy-producing foods.

The minerals most commonly found in the ash of vegetable and animal foods are phosphorus and potash. Not all foods carry these and other minerals in the same proportion.

See the importance of this statement? You cannot get your full supply of all the required minerals without eating a variety of food. The particular elements the infant demands can be had from milk. But in adult life you must have the salts that other foods supply in larger and more appropriate quantities than milk does.

In the ash of the human body are found 15 or 16 different mineral substances. This means that a well-nourished body must have an

unfailing supply of 15 or 16 minerals.

How do we get these salts? What are their sources?

It may be interesting to go a bit into detail in this discussion. For instance, what could you hope to have in the way of hair if you could not get sulphur? This mineral is an essential ingredient of hair and the hair could not grow or thrive without it.

Sulphur is found in combination with certain protein foods. It is in the gluten of wheat. Likewise, it is one of the ingredients of peas. Of course there are other sources, but these are examples.

Potash is essential to overcome acidity. Meat and potatoes, wheat and peas, contain it.

Soda and chlorine are found in animal flesh. Likewise the ordinary table salt supplies them. The vegetables have small amounts.

The green vegetables, particularly the leafy vegetables, carry iron. Spinach, oatmeal and potatoes contain iron. This is a mineral the blood must have if health is to be maintained.

Fortunately some of the common foods have iron. Apples, beef and the yolks of eggs carry it.

Iodine is in the carrots. Lime is in the milk, cereals, eggs and vegetables.

The fruits and all the vegetables possess valuable mineral salts. You cannot get on without these. Health depends on taking some of every salt.

# THE HOME KITCHEN

By Jeannette Young Norton

## Suggested Menus for These Who Are a Bit Overweight

To diet or not to diet is the ever-present problem of the overweights, while the underweights cry for foods that are fattening. Dear, dear, it is quite a problem in either case. Quantity and unwise combinations of foods usually cause the trouble for the over-weights, and they should take steps to correct it.

To embark upon a diet sledge without medical guidance is foolish, for we should know definitely what is making us fat or lean. When we know then we can progress with understanding. We do know that to reduce the quantity of food, avoid sweets, gassy and heavy foods, too many starches, substituting buttermilk for tea and coffee, giving up cream and cocoa, will start the good work of reducing before one consults a doctor.

The body, like all pieces of complicated machinery, constantly needs renewing by careful feeding, proper rest, exercise and a calm, peaceful state of mind.

If the over-weights have a well-developed sweet tooth they must mentally extract it, cutting out sweets of all kinds except the natural sweets of honey, maple sugar and the sweets of the fruits. It has been aptly said that "just as we begin to learn to live we commence to fall to pieces." This is unfortunately due to wrong feeding in most instances, which at least is one thing we can correct.

## STYLE EDICTS

Paris, March 2—When Milady puts her best hand forward at chic gatherings on early spring and summer wear the fashionable black suede gloves that are appearing in gaudy and moustiquaire lengths.

The backs are worked in elaborate open work designs surrounded with rhinestones. And for the very long ones which are often worn, the designs are extended all the way to the elbows; for the gauntlets they are likely to form a flaring cuff above the wrists.

For afternoon wear the glove-makers are emphasizing long fine suede gauntlets with pointed scalloped tops trimmed with inch-wide borders of printed suede in delicate cross-bar and other designs. Colors harmonize with the costumes. One striking glove ranges from white polka-dots printed on a deep-blue forming a V-shaped trimming to plain white buttonless gloves of which the backs are heavily stitched in the same colored silk.

Red and green crocodile is being shown, as well as lizard, but "snake" is considered a bit passe.

For the tailor, washable kid in beige or white with handstitching in black is very smart. Plain beige will also be worn this spring with the reptile bracelets with tiny jeweled buckles which are very popular this year.

Other novelties are small round discs of tan velvet held in place by a single rhinestone as a trimming for beige glove and suede gloves; gold studs on the top of the black kid; chenille dots in varying shades of beige and tan on rose beige.

One of the most carefully arranged diet systems is that which calls for a fruit, a starch and a protein meal daily instead of mixing the foods. The breakfast is the fruit meal which is re-mineralizing and re-vitalizing. It consists of one raw and one cooked fruit, or both raw if desired, and a glass of milk. The milk combines with all fruits when starch or sugar is added. The fruits will not cause acidity when not combined with breads, cereals, pastries, jams, syrups, potatoes, or the dough pastes.

Luncheon is the starch and sugar meal that produces heat and energy. The raw and cooked vegetables supply the food salts and vitamins required. This menu does not sound like starvation. A baked sweet or white potato, a creamed vegetable, celery, an onion salad with lemon juice and a very little olive oil. Whole wheat bread with a tiny pat of butter, and a glass of milk, or buttermilk.

Dinner is the protein and building meal of the day. Meat, fish, fowl, cheese, nuts or game may form the main dish. Creamed spinach, boiled cabbage or other non-starchy vegetables, a fruit salad and dates or figs for dessert if liked. Soup is a habit, but vegetable soup may be served without rolls, crackers or toast sippets. If the coffee habit is too established to break then take it black without cream or sugar. If hungry before going to bed drink a glass of orange juice or milk, or eat an apple or an orange. A grapefruit if better liked.

Those who are troubled by the fermentation of their foods, will find this division of the fruits, starches and proteins a great help to them. By a little experimenting menus of this class will not be found difficult to vary. Many people find that by eating meat only twice a week they remedy troubles of long standing. When over tired, instead of eating at once it is wiser to take a cup of hot water, a glass of warm milk or orange juice, and rest at least an hour before eating. Simple precautions like this often save us a lot of trouble if obeyed. As to water drinking, do it between meals. The milk, fruit juices and the vegetables supply a generous amount.

## Compare Delivered Prices!

IN buying your new car, we have this suggestion to offer: Find out both the factory (f. o. b.) price and the delivered price of each car under consideration. See how much difference between the two prices, and ask why.

You will discover this: That Nash "400" delivered prices are closer to the factory prices than competitive cars. Because Nash cars are factory equipped with

hydraulic shock absorbers, bumpers, tire lock—every necessary accessory.

All these are bought in tremendous volume, and all are included in the factory price, instead of being added as "extras," at retail figures, by the dealer.

Some dealers (not Nash dealers) add as much as \$50 or \$60 for bumpers alone. Buy a "400," and get more for your money!

## TWO KILLED IN WRECK OF TRAIN

Heavily Laden Cars Run  
Wild Down Grade;  
Trainmen Buried

Pottsville, Pa., March 2.—Two trainmen were killed and another seriously injured when a string of loaded coal cars ran wild in the Reading railroad yards at St. Clair, Pa., striking a locomotive and toppling 35 cars today.

The dead are Guy Frantz, of St. Clair, engineer, and Joseph Hartnett, of Schuylkill Haven, a brakeman. John Howells, of Port Carbon, also a brakeman, was seriously injured. The trainmen were buried beneath the wreckage.

The loaded coal cars were standing in the yards when brake couplings apparently slipped, allowing the string to gain such momentum that when they struck the locomotive, the trainmen had no warning of impending death. Thousands of tons of coal and steel buried the men who were extricated by fellow workers.

County Coroner Pegley arranged an inquest.

## Spans Arid Country in Single Flight

George Haldeman, the American aviator, who first came into prominence as Ruth Elder's pilot, is shown in gay Havana upon his arrival after a record non-stop flight from Toronto, Canada. The intrepid flier is seen wearing a cap and surrounded by Cuban officials and other dignitaries who were at the field to greet him. A little later he learned to his consternation that he had forgotten to make proper passport arrangements to allow his departure.

### Peach Grower's Friends.

The ladybird beetles are perhaps the most beneficial of the several insects that act as a check on the peach tree insects. They prey upon scale insects, aphids and thrips. The twice-stabbed ladybird beetle is usually prevalent on peach trees that are heavily infested with the San Jose scale. It is jet black in color and has two orange or red spots on the back. Ladybird beetles take their nourishment by sucking scale insects dry. They also assist materially in checking infestations of the rusty-brown plum aphid or other aphids. Syrphus flies, lacewing flies, tachina flies, ground beetles and some of the assassin bugs and preying mantis are other insects that are beneficial to the peach grower.

## Orrville Bows To Stonemen In Slow Game

Red and Black Wins Easy 29 - 12 Decision In Slow Contest

(Continued From Page One)

Orrville was still more powerful in the third session, and again scored only two points. Salem scoring nine. A long side shot by Ulrich, Orrville guard, was the last bucket scored against Salem from action.

The game was far from interesting—one of those affairs that make basketball unpopular—Salem being unable to hit the hoop when they got hold of the leather, while Orrville seldom had the sphere in its possession long enough to work it down to court to get within range of the Red and Black ring. All Orrville scored during the game was three field baskets, and added its other half-dozen points from the foul-line.

Salem never had to exert itself, and for its first game in the tourney, really didn't look so bad. The lads might, however, shake hands with themselves on the fact that they didn't pull a tougher aggregation for their opener, as it would be fairly healthy to predict that had it been anyone but Orrville, one Akron hotel wouldn't have had the patronage of 10 Salem basketballers.

## The Braves Don the War Paint

Under the blazing Florida sun at St. Petersburg the Boston Braves are getting into shape for their trek along the National League warpath. At the left, "Lefty" Brandt is shown oiling the joints of his famous port paddle, "Red" Smith (center) is a rookie who makes up in promise for what he may lack in big time experience. His batting average is apt to prove a big nuisance to somebody—and not to Boston. George Sisler (right) veteran first baseman, is caught in the familiar act of spearing a high one.

## RELIABLE USED CARS

It pays to go  
to the Buick Dealer

Two used cars may look much the same from the outside. Mileage, model, tires and general appearance may be all about alike.

Yet there may be a great deal of difference nevertheless—a difference in mechanical condition which will soon show up in actual driving.

You have only the word of the dealer to go by.

That's why it pays to go to the Buick dealer. You can rely on what he says. And you may be sure his price is fair.

## Sebring Plans Court Tourney

SEBRING PLANS Feb 8 -The

Sebring, March 2.—Sebring High school plans to present its second annual basketball tournament for amateur teams of Northeastern Ohio in three sessions, Friday and Saturday, March 22 and 23.

Arrangements are now being made to offer high class awards to winning participants. Already the management stands ready to offer the winning team ten gold basketballs and a 15-inch silver trophy, the runners up, ten individual silver basketballs and a suitable trophy, while silver cups and figures in relief, none less than 8 inches high are to be awarded to the most valuable player, high point man, and best foul shooter. If possible, other awards shall be made.

Last year on the corresponding Tuesday and Saturday, 23 teams entered this tourney. The classic was won by the Lex Sandwich Shoppe.

of Alliance, with the Sebring Linoges China as runners-up. The East Liverpool Laughlin China team, the Massillon Aces, Youngstown Eagles, Alliance Copey, Motors, Damascus Quakers, Salem Pirates, Canfield Tigers among others made the tournament interesting. Everything went smoothly, but the management believes with last year's experience behind them, the 1929 affair will be even more a top-notch arrangement. One of the slips made last year was the failure to seed the strongest teams in different brackets, and as a result several strong teams were eliminated in the first round. This shall be corrected this year.

The last day entries will be allowed to this tournament, has been set for Tuesday, March 19. Entry blanks and additional information

will be furnished upon request by the tournament manager, T. J. Verma, of Sebring High school, Sebring, Ohio.

## McCulloch's

Don't you wonder sometimes why your housework takes so much more time than other women give to household cares?

Cleaning, for example. It is the greatest time-consumer imaginable—unless you use the fastest, easiest, most thorough method available, Hoover cleaning. For the Hoover removes more dirt per minute than any other cleaner.

Why not have a demonstration of The Hoover and its cleaning principle, "Positive Agitation," in your own home. Convenient terms. Liberal allowance for your old cleaner.

## Torch Murder Trail Hard to Follow

The woman pictured above is a reconstructed conception of the victim of New Jersey's second torch mystery which parallels the case of one year ago of Margaret Brown, Park avenue governess. Hobart Templeton, upper right, is shown examining the fingerprints taken from the hands of the unidentified woman and, upper left, Dr. T. F. Walsh is searching for some clue to her identity from the slain woman's teeth. Circumstances are so familiar to the former unsolved mystery that the police believe the crime was committed by the same fiend.
